

Greece

Hi, my name is David and I live in Greece. The capital of Greece is Athens. There are about 10,500,000 people here and it is in the south of Europe.

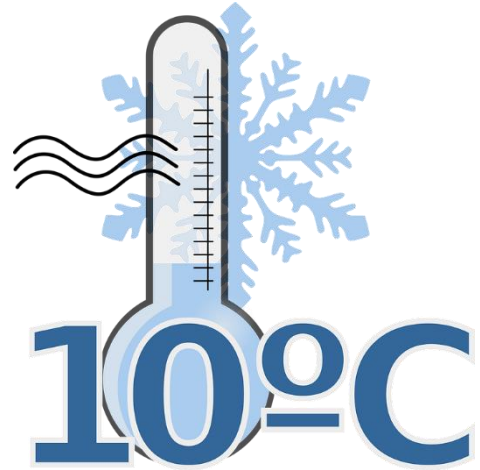

Here there are a lot of mountains, lakes and rivers. For example, mountain Olympus, mountain Smolikas, Aliakmonas river, Trichonida lake and more.

The weather in Greece is mild in winter and hot in the summer, for example the temperature is about 5-20 °C in the winter and in the summer it is about 20-40 °C.

We have got a lot of popular sights like the Acropolis, Delphi and a lot more for you to see. I like my country because it has very good temperature, a lot of sights and very special food. What else would you want?
