

GREECE

Hello! My name is Katerina and I live in Greece.

Greece is a really lovely country. The population is about 10 million people.

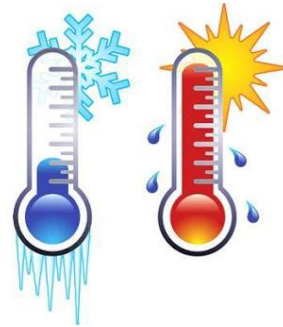

The highest mountain is Olympus and it's about 2.918 meters! There are many islands in Greece but the capital of Greece is Athens.

The weather in Greece is mild because it sometimes snows and often rains!

The sun in Greece always shines.

When it rains I go outside and ride my bike.
When it snows, I play snow fight with my parents.

The most popular sight in Greece is the Acropolis and it is very old, too. It is in Athens and is made for the ancient goddess Athena.

I think that Greece is a very lovely country, but some things that have happened in last years have changed me! I want to live in New York City because it is better than Greece, but I love Greece, too.
